

Hollow Structural Sections

The following pages contain a listing of the available structural steel HSS in the U.S., Canada & Mexico from major steel producers as well as which mills are producing HSS.

This availability listing is useful in the design process as a reference to determine the general availability of specific HSS. Generally, where many producers are listed it is an indication that the particular HSS is commonly available. Except for the larger HSS, when only one or two producers are listed, it is prudent to consider contacting a steel fabricator to determine availability.

The following producers are included in this survey:
