

editor's note

Do you know what's shakin' at AISC?

If you're a steel groupie, you've already marked your calendar for the 10th anniversary of SteelDay (September 28!). This celebration of all things steel features the usual shop, site and mill tours (visit www.aisc.org/steelday to find an event near you) but we also have some new and special activities planned.

- You can earn 1.0 PDH by attending our webinar on the "Birth of the Steel Skyscraper." This free event traces the rise of innovation in structures and brilliantly describes many engineering success stories.
- On the lighter side, everyone is invited to AISC's Steel Quiz Live! Do you have what it takes to be crowned Steel Quiz Champion? There's only one way to find out.
- You're also invited to an exclusive prescreening of a new documentary film, *Leaning Out*, featuring the story of acclaimed structural engineer Leslie Robertson and his perspective on the destruction of the World Trade Center. (And yes, you can earn 1.0 PDH by watching the free online movie.)

Local activities range from an architectural boat tour in Chicago to a happy hour networking event at Baileson Brewery in Houston. And Puma Steel in Wyoming is offering \$10,000 in scholarships to student contestants in a SteelDay Welding Contest. You can read about more SteelDay events on page 58.

But even if you can't make it to one of the fun and informative events, we still have something special in store for you. We're unveiling the latest edition of the *Seismic Design Manual*. Based on the 2016 *Seismic Provisions for Structural Steel Buildings*, the new manual is the ideal resource to help you better understand, design and construct buildings in seismic areas. We've reduced the cost of the seismic manual from \$200 to \$100 for AISC members. And as part of the SteelDay celebration, you can get an additional 10% off on the seismic manual or anything else in AISC's bookstore (the sale runs September 28 through October 1).

So in case I don't see you in person, let me just say it now: Happy SteelDay!
